

TakThree Remote Controller

Product Description

TakThree Wireless Remote Control, This device operates smart luminaires via wireless signals, enabling ON/OFF switching, color adjustments, color temperature tuning, and one-touch activation of smart scenes pre-configured via the app. When neither the remote nor the luminaire has undergone app-based network enrollment, the remote can directly control the lights (scene functions remain unavailable).

Note: Once luminaires are enrolled in the network, the remote must also undergo network enrollment to control these networked devices.

Product Parameters

Product Name	TakThree Wireless Remote Control
Product Model	UBTY01
Operating Voltage	AAA Battery
Operating Temperature	-20°C-45°C
Communication Protocol	Bluetooth Mesh
Ambient Temperature	≤90% No Impact Condensation
Product Dimensions	86mm x 86mm x 15mm

Button Description

ON	Short Press: Full ON (Cycles Through 3 Color Temperatures)	OFF	Short Press: Turn all OFF

S3	Short Press: Activate Scene 3 (Requires APP-configured Scene)	S4	Short Press: Activate Scene 4 (Requires APP-configured Scene)

Network Settings

Press and hold both the 'Full ON' button and the 'Toggle Color Light' button for over 5 seconds. When the indicator lights flash alternately, the wireless control module enters activation mode. Release the buttons, then use the mobile app to search for and add the module to the app's network. If no operation is performed within 30 seconds, the device reverts to low-power mode and restores factory settings.

Note: The remote is in a dormant state, so the app cannot directly control the luminaire devices.
